PROFESSIONAL SUMMARY

Self-motivated and results-driven Full Stack Developer with over 2 years of experience building modern, highly responsive, and user-friendly web applications. Demonstrated a strong passion for complex software architectures and programmatic problem-solving early on during freshman year at Addis Ababa University. Proficient across modern web frameworks to design end-to-end solutions, structure RESTful APIs, and deliver robust web products utilizing clean UI/UX paradigms. Committed to continuous professional refinement, semantic clean code structures, and engineering high-impact technical ecosystems.

WORK EXPERIENCE

Frontend Developer Intern

April 2025 – Present

Fluentian (Remote)

- Collaborated closely with cross-functional design and backend engineering teams to construct comprehensive, scalable full-stack web applications.
- Engineered and optimized pixel-perfect, highly responsive user interface components leveraging React.js and Next.js frameworks.
- Seamlessly integrated complex backend ecosystem features and REST APIs with client-side applications ensuring optimal data mapping.
- Elevated overall user journey metrics by instituting clean, standard-compliant, modular, and reusable frontend component design libraries.
- Contributed systematically to production-grade applications with targeted emphasis on runtime performance scaling and asset delivery optimization.

EDUCATION

Bachelor of Science in Information Systems

In Progress

Addis Ababa University, Addis Ababa, Ethiopia

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap
Backend	Node.js, Express.js, RESTful API Design & Implementation
Databases	MongoDB, MySQL
Tools & Core	Git, GitHub, Version Control Pipelines

SOFT SKILLS

Core Capabilities

Analytical Problem Solving, Interpersonal Communication, High Adaptability, Technical Attention to Detail, Cross-Functional Team Collaboration
